

HB 2304 -- PHYSICIAN LICENSURE

SPONSOR: Frederick

This bill provides that an applicant for licensure as a physician or a surgeon who does not achieve a passing score within three attempts on a licensing exam administered in one or more states may petition the State Board of Registration for the Healing Arts for an exception to such requirement based upon unusual or extenuating circumstances. An applicant who does not pass a step of the United States Medical Licensing Examination (USMLE) within three attempts or does not pass all three steps within a seven year period may also petition the board for an exception.

Applicants must provide proof of successful completion of the USMLE or an exam administered by the National Board of Osteopathic Medical Examiners, rather than just proof of completion.

The bill removes the provision that specifies that in order for the board to waive licensure requirements for an applicant who is licensed in another state the applicant must be certified by a certifying agency in the applicant's area of speciality.

The state must not require adherence to the Federation of State Medical Boards' framework as a condition for physician license renewal or any form of specialty medical board certification to practice medicine within the state. The State Board of Registration for the Healing Arts or any other state agency must not discriminate against physicians who do not maintain specialty medical board certification.

This bill is similar to SB 772 (2016).
